Sinking of Wells for Agricultural purposes.

64. **MR. S. PIRAVIPERUMAL PILLAI** (*Commerce and Industry, South*): With reference to the statement made by the Dewan in February 1924 at the twentieth session of the Assembly, *viz.*, "the Industrial Engineer is investigating the problem of sinking wells and lifting water on high level lands where commercial crops like banana and sugarcane can be profitably grown," will the Government be pleased to state whether the investigation is completed, and, if so, what action they have taken in the matter?

MR. N. NILAKANTA PILLAI (*Secretary to Government on other duty*): The investigation regarding lift irrigation has been completed and the Department of Industries is now in a position to advise prospective purchasers regarding the choice of suitable pumps and elevators for agricultural purposes. As regards well-sinking, a series of boring experiments have to be carried on to find out the depth of the water-bearing strata. For this purpose, a power-driven drill has been purchased by Government, with which a systematic investigation will be undertaken.
